Summary of Information

Vessel seems to be larger than the average pleasure/fishing craft, steel construction, white superstructure that seems to extend a large percentage of the length of the ship. There is a small amount of red trim, and the hull is a dark color, perhaps dark blue. Ships railing are varnished wood, and there are white, covered lifeboats. Impression of small cruise vessel, but more utilitarian in purpose--perhaps container ship. Vessel is presently vic 2150N/6730W--about 200 miles ~~south~~^{east} of Turks/Caicos Islands.

Contraband is white, has a stinging smell to it, and a texture like salt. There is a sense that the material occupies a relatively small portion of the vessel's bulk. Material is located slightly to port and slightly forward of midships, below the deck line but above the waterline. It seems the vessel intends to carry contraband cargo through to final destination. Two places identified. Strongest indication was Savannah, Georgia area, but a secondary indication in the Tampa/St. Petersburg area.

Summary of Information

The target is a sea going vessel. It is currently located at 23 30 N and 65 30 W. This area is experiencing either a storm or heavy seas/large swells at the present time.

There is a middle-aged man associated with the target. He is standing on something resembling a bridge or "look-out" and is looking out over the vessel and the sea in front of him. He is also watching others performing an operation, duty or activity.

The contraband has a sense of being stratified; that is, separated by texture or density. It is located at midship, near the starboard side and just above the waterline. It is packed in an area or section that is tightly sealed.

This material will be transferred on or about 29/30 May 1990 at 27 15 N and 71 10 W, a point east of the Bahama Islands.

The destination for this material is within the northern half of the eastern coast of Florida; possibly near the Georgia/Florida border.

After clearing the Peninsula de la Guajira, the vessel took a heading of 63 degrees to 15 30 N 65 W. It then changed to a heading of 24 degrees to 23 30 N 62 30 W. It changed its heading again to that of 309 degrees, where it will precede to the transfer point of 27 15 N 71 70 W.
